

Software Engineer –Strategic Solution Expert

Full Time – Madison, WI

This Job is for You if You Thrive in an Environment Where

- You handle multiple, simultaneous projects in a fast-paced environment while never compromising quality.
- Your expertise and ingenuity solve technical problems.
- You have drive, determination and a self-disciplined approach to achieving results.
- You engender trust, demonstrate a sense of urgency and assure consistent and accurate achievement of quality standards.
- You make decisions that support company guidelines authoritatively and quickly.
- You have a technical and analytical focus while working within established standards and guidelines.
- You will present new ideas and concepts after carefully analyzing and testing them.
- Your communication is task-based and technically oriented.

What You Will Do

Collaborate with the customer to determine the best solution for their business needs. Perform internal unit testing to ensure quality of the software. Install and configure the software for the customer. Provide Go Live support to the customer in the use of the software and help transition to support. As a strategic solution expert, the Software Engineer is also a resource for and assists internal staff to resolve customer issues and questions. Once fully integrated, our customers can hit the ground running with software that improves their whole shipping process, reduces freight spend and supplies clean, accurate, reliable data. We pride ourselves on being able to quickly and fully integrate with any ERP/WMS in a short amount of time.

Qualifications

- Minimum of Associate Degree in Computer Science or related field.
- Experience with object oriented programming, such as C#, C++, Java or VB.Net.
- Ability and desire to work with Microsoft SQL Server and C#.
- Experience in full project lifecycle from design to support, client/Server environment and source code control systems.
- Resourceful problem solving skills, with the knowledge and confidence to ask the right questions so problems, issues or concerns are addressed quickly before they occur or become critical.
- Responsive and reliable with keen attention to details.
- Desire to enhance existing technology through innovative and collaborative approaches to exceed customer expectations.
